

REAL PEOPLE AND REAL LIVES

We are an accounting firm with a difference we want to understand your business because we know that we are dealing with businesses, that involve real people and therefore affect real lives.

Cleland Hancox Limited has served our business for as many years as we can remember and we have stuck with the firm for several reasons.

This family type accountancy firm has met the needs of our farming business in a relaxed yet professional manner, steering it between grass roots issues, bank and tax demands and pleasurable pastimes.

Our accountant is constantly suggesting new directions in which to take our business at the same time as giving us encouraging feedback on our current operation.

Having a good, long-standing relationship with a trustworthy and reliable accountant frees us up to manage what we hope we do well.

Bruce & Sheryll Davies
DAIRY FARMERS

We like the personal touch. Ray has been our accountant for many years and understands our business. The team at Cleland Hancox Limited do a great job of getting things done promptly and thoroughly. We like the fact that we can negotiate the fees and appreciate Ray's advice with regards to Trusts, Companies and our Partnership. We feel as though our accountants are wanting us to succeed in our business and do their best to help.

We appreciate the advice regarding tax and the help we get to minimise paying tax legitimately. Ray and the team have the utmost integrity and we have grown to trust them. We know that our accounts are well prepared and accurate, that is important to us.
